PGT® WinGuard® Vinyl Doors	16
PGT® WinGuard® Vinyl Windows	22
Glossary	35

Live the life you want *where* you want — a custom detailed home that offers you and your family beauty and peace of mind for years to come. That’s the freedom PGT® gives you.

From the day they’re installed and for every moment you own your home, our impact products stand up to outside elements and give you confidence in your environment, your lifestyle, and your investment.

Designed to deliver an impact

INCREASE YOUR HOME VALUE

Most homeowners who install impact doors and windows see significant increases in the value of their homes.

95%

of customers' home value increased — with an average gain of nearly \$34K¹.

LOWER YOUR ENERGY AND INSURANCE COSTS

Impact products make your home more energy efficient, reducing energy bills by an average 12%¹, and lowering insurance costs².

43%

of homeowners saw a reduction in their insurance costs¹.

Hammock Homes
Hammock Model
New Smyrna Beach, FL

FEEL MORE SAFE AND SECURE

When it comes to guarding against intruders and standing up to the strongest weather conditions, impact products simply perform better.

50%

more resistant to more intruders than non-impact glass due to impact glazing.

ENJOY THE PEACE AND QUIET

Impact products give you peace and privacy by minimizing nearby noises like — lawn mowers, traffic, and loud neighbors.

65%

sound and noise reduction when impact windows are installed².

1. 2020 Consumer Perception Study by John Burns Real Estate Consulting LLC.
* Impact windows with low-E and/or insulating glass as compared to single pane non-coated glass
2. Source: Sound reduction percentage is based upon the WinGuard® Aluminum picture window (PW7720A) OITC rating compared to a single-pane window with an OITC rating of 19. Actual results may vary.

Innovation for a lifetime

PGT® has led the impact industry for more than 40 years by improving safety standards, pushing innovation, and delivering superior performance.

LAMINATED INSULATING GLASS

LAMINATED GLASS

Two panes of glass bonded together with a clear interlayer to form an incredibly strong glass “sandwich” that functions as a single pane, with additional noise-dampening and security benefits.

THE INTERLAYER

The interlayer is a transparent, shatter-resistant plastic membrane that is remarkably tough and flexible, holding the panes of glass firmly in place even if cracked from the outside. The interlayer also protects furniture and decor against fading and sun damage.

THERMOPLASTIC SPACER (TPS)

Our unique TPS spacer and sealant system is air-tight, maintaining the thermal insulation and preventing condensation and seal failures.

INSULATING AIR SPACE*

The layer between the outside pane and inner laminated glass pane acts as a barrier that slows heat transfer and dissipates sound. Argon gas can be inserted for even greater energy efficiency.

UV PERFORMANCE COATING

A molecular bonded coating on the glass surface that reduces heat buildup in your home, saving cooling cost.

OUTSIDE PANE*

Single pane of glass that increases a window's insulating properties while maintaining clear sightlines.

MULTI-CHAMBERED FRAME

PGT® WinGuard® Vinyl windows and doors feature a multi-chambered frame and warm-edge spacer technology to increase energy efficiency.

With more than 7 million units installed, we're America's authority on laminated glass. Discover more:

Zero Failures

Over 7 million units installed with zero reported impact failures – an unmatched record for our industry.

Significant Sound Reduction

Minimize noises in and around your home. Product options are subjected to STC testing.

ENERGY STAR® Options

Laminated insulating glass offers advanced energy-saving performance. WinGuard® Vinyl has many options to maximize energy efficiency and achieve ENERGY STAR® ratings.

Hours of Testing

PGT® WinGuard® Vinyl products endure hundreds of hours of testing to meet or exceed Miami-Dade Building Code requirements.

Leader in NOA Certifications

PGT® is a leader in the impact category with 44 Miami-Dade Notices of Acceptance.

Certifications & Ratings:

National Fenestration Rating Council
Sound Transmission Class (STC)
Miami-Dade Notice of Acceptance (NOA)
Florida HVHZ Product Approval
Texas Department of Insurance
OITC (Outdoor-Indoor Transmission Class)
AAMA Tested/Keystone Certified
ENERGY STAR®

*Included with laminated insulating glass packages for highest energy performance.

Ready to say goodbye to shutters? Installing PGT® impact products is an investment in your home and lifestyle with everyday and long-term rewards. WinGuard® is engineered for performance.

Convenience

PGT® provides effortless impact protection from the moment of installation. Shutters require your presence for timely setup before every weather event.

Comfort

PGT® products allow for natural light while significantly quieting outdoor noise during a storm. Shutters darken your home and offer minimal sound protection.

Effectiveness

A durable interlayer keeps impact glass within the frame even if struck, shielding your home from flying debris.

Service

We're committed to delivering the best service in our industry, making the process from purchase to ownership simple and stress-free.

Value

80-86%

While the initial investment for impact windows is higher than shutters, the ROI for impact windows ranges from 80% to 86%. Shutters max out at around 40%¹.

Freedom

You get the everyday superior performance of PGT®. — less noise, more security, and lower energy costs — no matter the weather. Shutters are manually removed after every storm.

Elevated style. Designed for customization.

PGT® WinGuard® Vinyl products are engineered for the highest quality and designed to fit any style of home with the most customized glass and frame options available.

We're so sure of their performance, we back our windows and doors with one of the industry's best warranties.

LIMITED LIFETIME WARRANTY

On the frame, hardware, screen and moving parts

Many PGT® WinGuard® Vinyl products meet ENERGY STAR® ratings. Talk to your local dealer for more information.

“

Overall, it's been a good investment. I feel confident in my choices of windows and doors, both for the looks and value of my home.

– James P., Tampa, FL

PGT® WINGUARD® VINYL DOORS

Sliding Glass Door

This smooth operating door will add extra security to your home and let natural light into your living room or master bedroom.

Pages 18-19

French Door

Pairing elegance and high functionality, this single or double French door can be equipped with European-style hardware and is available with matching sidelites.

Pages 20-21

Single Hung Window

Raised from the bottom with a fixed top half, our single hung window offers ventilation and effortless protection in a traditional style that can be used throughout the home.

Page 24

Double Hung Window

Removable top and bottom sashes maximize ventilation in your home and make exterior cleaning easier than ever. An ideal match for lanais, patios, and sunrooms.

Page 25

**Casement Window
Fixed Lite Casement Picture/
Architectural Window**

The foldaway handles of these windows prevent interference with your curtains. Pair them beautifully with matching Awning and Fixed Lite Picture windows.

Pages 26-27

Horizontal Roller Window

Blending modern style and top-notch protection, this easily operated window is perfect for kitchens, bathrooms, and more.

Page 28

Awning Window

Designed for use in high spaces, this beautiful-yet-functional window is designed to block rain from entering, while providing outstanding ventilation and light.

Page 29

Fixed Lite Picture Window

A non-operable window that enhances the look of living rooms, kitchens, and master bedrooms with maximum, unobstructed sightlines.

Pages 30-31

GLOSSARY

Argon Gas — A safe, odorless, colorless, non-toxic, non-flammable inert gas that is commonly used in place of air between the glass panes of an insulated Low-E glass unit to reduce temperature transfer.

Corrosion Resistant — Refers to how well a substance can withstand damage caused by oxidization or other chemical reactions.

Design Pressure — Wind load pressure, expressed in pounds per square foot (psf).

ENERGY STAR® — An independent U.S. government program that establishes a standard set of guidelines to recognize the energy efficiency of various products. ENERGY STAR® guidelines are used in conjunction with a variety of building materials, including windows and patio doors.

Florida Product Approval — A statewide approval system that requires manufacturers to submit testing and engineering data to ensure certain building components meet Florida Building Code standards.

Forced-Entry Resistance — The test methods intended to establish a measure of resistance for window assemblies subjected to attacks, other than by impact.

Impact Resistant — Shatter-resistant glass. When the glass breaks, the shattered pieces will adhere to the interlayer.

Insulating Glass — Window panes separated by an air- or other gas-filled space to reduce heat transfer.

Interlayer — A shatter-resistant plastic membrane sandwiched between two panes of glass.

International Building Code — A model building code developed by the International Code Council that has been adopted throughout most of the United States.

Laminated Glass — Two panes of glass bonded together with a strong, clear interlayer.

Laminated Insulating Glass — Comprised of three panes of glass: two panes bonded together with a strong, clear interlayer and one pane for added insulation.

Large-Missile Impact — Test used on windows and doors in which a 9-lb. 2' x 4'

is propelled at a speed of 34 mph onto test subject.

Low-E (Emissivity) Glass — Glass with a transparent, metallic oxide coating applied onto or into a glass surface. The coating typically allows short-wave energy to pass through but reflects long-wave infrared energy, which improves the U-value.

Miami-Dade Notice of Acceptance (NOA) — A certification method controlled by Miami-Dade County that requires products to be tested to the TAS testing protocols.

Monolithic Glass — A single pane of glass casting using one glass thickness.

National Fenestration Rating Council (NFRC) — A non-profit organization that provides energy performance ratings on windows, doors, skylights, and attachment products.

Privacy Glass — Glass that has been made translucent instead of transparent.

Sea Turtle Protection Code — Protects sea turtles along the Florida coastline during nesting season by restricting the amount of light permitted through windows and doors.

Sound Transmission Class (STC) — An integer rating that provides an estimate of the sound insulation performance of an interior building partition (such as a window or door) between indoor spaces. The higher the number, the less sound is transmitted.

Tempered glass — Treated glass that is strengthened by reheating it to just below the melting point and then suddenly cooling it. When shattered, it breaks into small pieces. Approximately four times stronger than standard annealed glass; is required as safety glazing in patio doors, entrance doors, sidelites, and other hazardous locations. It cannot be recut after tempering.

Ultraviolet (UV) — The invisible rays of the spectrum that are outside of the visible spectrum at its short-wavelength violet end. Ultraviolet rays are found in everyday sunlight and can cause fading of paint finishes, carpets, and fabrics.

Window Opening Control Device — A device that limits the opening of a window sash to a predetermined position. The device includes a release mechanism that shall allow the sash to be fully opened and that automatically resets when a window is fully closed.
